Description:

The Neoss implant system is a complete system of endosteal dental implants with corresponding instruments, prosthetic products and accessories.

Technical information on the specific Neoss implant system product you are using please consult the Neoss Implant System Clinical Handbook (10501) and translated versions.

Neoss implants and associated instruments and accessories are designed for prosthetic restorations and impression taking on Neoss implants and abutments. These abutments and prosthetic accessories are available in sizes and shapes to fit individual patient needs and different applications.

For a specific product description, article number and dimensions please consult the product label and the Neoss Product Catalogue.
